

# Bibliography Example

Example Author

2025

## Introduction

This example demonstrates bibliography file support in txt2tex.

The formal methods community has produced many influential works on Z notation. The foundational work by [Spivey, 1992] introduced the Z notation, while [Woodcock and Davies, 1996] provides a comprehensive guide to using Z in practice.

This example uses a separate .bib file for bibliography management. The build process automatically runs BibTeX to process citations.

## Solution 1

When citing multiple sources, the bibliography is automatically generated from the .bib file. For example, [Spivey, 1992] and [Woodcock and Davies, 1996] are both included in the references.
