

Identifier Decoration in Z

Z notation uses decorated identifiers to distinguish input, output, and after-state variables. A prime (') marks the after-state; a question mark (?) marks an input; an exclamation mark (!) marks an output.

StateOp

count : $\mathbb{N}$

count' : $\mathbb{N}$

in? : $\mathbb{N}$

out! : $\mathbb{N}$

count' = *count* + *in?*

out! = *count*
