

GROUP and UNGROUP

txt2tex example

May 19, 2026

GROUP - Bundle Attributes into a Nested Relation

GroupMembers GROUP(*{name, email}* AS *contact*)
GroupMembers GROUP(*{username}* AS *members*)
 $\pi_{groupId, members}(\text{GroupMembers GROUP}(\{username\} \text{ AS } members))$

UNGROUP - Flatten a Nested Relation

GroupMembers UNGROUP *contact*
Enrollment UNGROUP *members*

Combined : GROUP then UNGROUP

GroupMembers GROUP(*{name, email}* AS *contact*) UNGROUP *contact*
